# ACRYLIC-WOOD LECTERN ESMERALDA - OAK-COLOURED

## PRODUCT DESCRIPTION

The combination of real wood and acrylic gives the lectern its unique design. Choose a clear or satinised front panel and let us apply your logo to it. Choose the colour of wood that best suits your interior.

### Esmeralda lectern

One of the best-rated lecture stalls is definitely the Esmeralda model. Esmeralda lectern is so popular because of the beautiful choice minus materials wood and plastic. The remote-controlled front panel in clear or satin plastic is also a feast for the eyes. The inherently classic lectern has a modern look thanks to the glass-look parts. As standard, this speaking chair is fitted with two intermediate platforms in the standing base. A nice place to put a glass or documents. The wide base of the front plate gives a unique space to present a nice logo or company name. The top shelf gives more than enough space for a laptop and a document. All kinds of connections are possible in the top shelf. These include audio and signal preparation, reading lamp for the top shelf and a drinking glass holder.

Place the lectern on braked castors to make it mobile and protect it with a dust cover or flight case during storage. A presentation furniture to enjoy for years to come.

## PRODUCT DESCRIPTION

### Milky-white acrylic lectern Alana

A remarkable lectern built from milky white acrylic. The lectern gets its remarkable shape by means of the **tapered front plate and its tapered side panels**. The small footprint makes for a modest place on the podium. The use of milky white acrylic makes sure its humble size is adequately compensated in expression. The lectern has a reading plateau large enough to fit two A4 documents side by side. In the reading plateau several accessories like a shock mount for microphone, signal connection like HDMI or VGA and reading lights can be prepared. In this way you can buy a fully outfitted pulpit.

# STAINLESS STEEL LECTERN ARC-LED - COLOUR OF YOUR CHOICE

## PRODUCT DESCRIPTION

### LED lit lectern Arc-LED

A very special pulpit with a RGB LED **lighted front panel**, is the pulpit Arc-LED. The classy base of this lectern is produced in brushed stainless steel. Its 10 mm thick acrylic curved front panel has been printed with a special LED matrix pattern, enabling the RGB LED strips, which have been invisibly incorporated, to diffuse its light all through the front panel. In the pulpit a touch panel is fitted enabling you to easily select colour and brightness or its **LED lighting**. You can choose almost any colour (256 available) really simply or you can choose/set a program enabling slow change of colour over time or its front panel. This way the audience will be captivated giving the lecturer the podium and attention he/she deserves.

Its convex front panel gives the lectern a spectacular look. It looks slim and distinguished. Its reading plateau is spacious enough to present multiple documents at once to the speaker. The lectern can be equipped with various accessories like for instance audio and signal preparation, light of the reading plateau, logo possibilities, castors and a whole lot more.

# METAL/WOOD LECTERN ARMAGOSA - WALNUT IN COLOUR

## PRODUCT DESCRIPTION

### Lectern Armagosa walnut

The Armagosa walnut lectern is a feast for the eyes. The very sturdy metal base of this chair, combined with the special side panels in wood or synthetic material, give it a fantastic design. The top panel is made of the same material as the side panels, so that the speaker also experiences the special design. The side panels are presented at an angle as they are mounted to the lectern by means of angle-welded tubes. The base, a 6-millimetre thick steel base, can be fitted with braked castors.

Below the centre of the top panel, a space is provided in the metal base through which an audio preparation or lamp wiring can be routed. There is enough space in the metal base to neatly guide all cables to the base. The metal base is completely covered at the back by a metal plate painted in the same colour as all the other metal parts. This plate is secured with m6 bolts and can easily be removed for service purposes. In the foot there is again a hole where the cables come out. The media specialist can choose which side to lead the cables to in order to connect them to the media facilities.

# ACRYLIC/ STAINLESS STEEL LECTERN LED BOX - COLOUR OF YOUR CHOICE

## PRODUCT DESCRIPTION

### Lectern in stainless steel acrylic front, Box LED

A very special pulpit with a **RGB LED lighted front plate**, is the pulpit Box-LED. The chic base of this lectern is produced in **brushed stainless steel**. Its 10 mm thick acrylic front panel is printed with a special LED matrix pattern, through which the RGB LED strips, that have invisibly been incorporated in the front panel, spread its light all through the front panel. In the pulpit a touch panel is built in enabling you to easily choose colour and brightness of the LED light. You just really simply choose any available colour (256 colours available) or choose for example a pre-set program by which the lighting of the LED panel continuously and slowly changes colour. By this the audience is captivated and the speaker will get the podium he or she deserves.

The large front panel gives the lectern a brilliant look. It looks impressive and noticeable. The reading plateau is spacious enough to show multiple documents to the speaker at once. The lectern can be upgraded with various accessories like for example audio and signal preparation, light on the reading plateau, logo's, castors and many more. You may have seen this lectern on tv or in the papers. ABN\*AMRO bank is just 1 of the well-known larger companies using this particular pulpit.

# WOODEN LECTERN CASTOR - WALNUT COLOUR

## PRODUCT DESCRIPTION

Pulpit made in 19 mm thick **oak veneer**. Thanks to the timeless and classic look it will fit in every traditional environment. The sturdy lectern can be provided with all kinds of options. There is also room for a logo or company name.

### Oak veneer lectern Castor

Castor is friendly **light weight** wooden lectern with curved side panels, giving the lectern its shape. For de speaker a glass tray is fitted between the uprights. By using poplar wood the weight is limited which is a premium when the lectern has to be moved regularly. The fun thing about this lectern is the fact that the model get a completely different look when changing an alternative wood choice. Oak gives its fragile shape more body. Other than that, it has an **excellent price/ Quality ratio**.

# NEPTUNE WOODEN LECTERN - BLACK

## PRODUCT DESCRIPTION

Discover the Neptune wooden lectern, a prestigious choice for your conferences. Its slim silhouette and elegant curves add an extra dimension to any speaker's presence. With its reading panel featuring a raised edge, your documents stay neatly in place.

### Neptune Wooden Lectern - Black

The Neptune lectern is available in lacquered wood or metal, with almost identical designs except for the base. Despite slight modifications, the final shape retains all its aesthetic appeal. The tapered front element curves back to emphasise the lectern and enhance the speaker's presence. The elegant lines and curved side panels add a distinctive touch to the design. Available in white, black and anthracite, each colour adds its own character.

**NB:** The castors shown are not supplied as standard with the lectern. They can be added to your order by selecting the product in the "Combine" options.

# WOODEN LECTERN RHEA - NUT COLOUR

## PRODUCT DESCRIPTION

A timeless designed wooden lectern with a large display and large glass tray. The **rectangular front plate** gives an even better look to this rostrum, especially when you add your logo or company name. A common, timeless and approved design.

### Lightweight wooden lectern Rhea

A wooden lectern with classic shape however slimmer and therefore more chic than most wooden lecterns on the market. Rhea is produced in oak veneer. **Veneer colour can be varied** using wood oil making it more or less dark according client wishes. Walnut or cherry colour can be realised this way, but keep in mind that by this method we cannot guarantee exact colour matches. If you are thinking of buying more lecterns in future it may be wise to ask for production in the proper veneer version. Rhea can be supplied usually from stock, but when we use a different veneer colour in production we need about three weeks. Another striking detail is its slightly backwards slanting front plate. In this its classic design gets a special touch. Also this wooden pulpit can, like all our pulpits, directly be fitted with various easy accessories.

## PRODUCT DESCRIPTION

Three dimensionally shaped lectern can be executed in either clear/white or clear/black design. This construction consists of **three vertical panels creating a 3D-effect**. For example one could put a monitor between the two front panels so as to feature yet another unique functionality.

## Robust acrylic lectern Roslin

In our category acrylic pulpits is Roslin model is probably our the most robust and chic model lectern. Roslin has a vertically placed 12 mm thick upright plate in white or black with vertically placed 12 mm thick clear acrylic plates in front and behind it. This gives the beautiful lectern Roslin a **three dimensional character**. The space between its clear front plate and the subsequent black or white plate is large enough to place a large size monitor between the plates. This way you will create a very special pulpit. Of course we can provide this for gladly. The base and its spacious top plate are produced in the same colour as its middle plate making an immaculate and special look. Taut, sturdy, beautiful and durable. A few characteristics of this splendid piece of equipment, which naturally can be enhanced with various accessories fitted to the reading plateau like an acoustic coupling for a microphone, a gooseneck light, and many more.

# METAL/PLASTIC LECTERN CONCERTO - WHITE

## PRODUCT DESCRIPTION

Concerto is not only used as a lectern, but also often as a music stand. The stable base ensures a stable stand. The large plastic reading surface (white or black) can be fitted with the option of inserting a tablet. The stand is manually adjustable in height. It is also easy to dismantle, making it easy to transport to other locations.

### Concerto lectern

Concerto is a multi-purpose piece of furniture. It can be used as a reading desk but also as a music stand. Its beautiful wide thick plastic reading panel makes it extremely suitable for use in any conceivable space. This beautiful product is also used as a menu holder in restaurants or a condolence register in a crematorium. Actually, it does not matter where you use the pulpit, everywhere it is a welcome functional and beautiful addition to the room. Add to this the fact that the price is very interesting, and you have an easy choice.

## PRODUCT DESCRIPTION

### **Giraldo, lectern made of a metal base with acrylate finish of the base plate and the reading platform.**

The Giraldo lectern annex presentation stand has a pleasant appearance. The strong metal base provides an enormous stability. The chic acrylic base and the beautiful acrylic reading tableau (on top of which a plastic strip is provided to prevent documents from sliding off) ensure that the speaker has a good grip on the presentation furniture. For a very reasonable price you can be the proud owner of a chic presentation stand and/or pulpit. No frills, what you see is what is delivered. With this lectern it is possible to order a limited number of extra accessories. Think of a clip-on reading lamp and a clip on microphone holder, a mobile platform for the chair and a cover. In this rostrum we do not build in a signal and sound connection. If you wish, you can choose from the rest of our extensive range on our websites.

## PRODUCT DESCRIPTION

### Rodriguez

The Rodriguez is a modern pulpit made of a combination of metal and acrylate. The construction and the base of the pulpit are made of silver-coloured metal and the front and reading plates are made of white satinated acrylate. This combination of high-quality materials results in a timeless appearance with modern design elements. Thanks to its metal base, the Rodriguez is an extremely stable and durable lectern that can be used time and time again for any kind of presentation. In addition, the acrylic components of this pulpit are less thick (5mm & 8mm) than those of comparable pulpits in our Bravour® series. This gives the Rodriguez a dynamic appearance without diminishing its stability.

# HEIGHT-ADJUSTABLE ACRYLIC LECTERN

## SIMPLE MOVE - BLACK

### PRODUCT DESCRIPTION

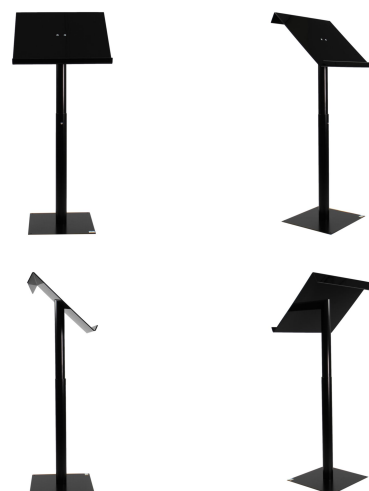

Simple Move is an entry-level lectern that meets the current requirements for making a lectern available to any target group. The Simple Move uses a 12 volt lift of the brand Linak and is easily operated by means of a high/low button. The cables and equipment are neatly concealed in the base of the lift. The chic solution makes virtually no sound. On the read-out tray a shockmount can be built in for you that is already wired to the base. You can also add a reading light to this piece of presentation furniture.

Electronically height-adjustable lecterns are used in all places where a speaker wishes to have a lectern at his or her disposal. In conference centres, in conference rooms in hotels and governmental meeting rooms. But also in education and museums, an electronically height-adjustable pulpit is a must. Educational institutions often use presentation furniture such as an electronic pulpit. Religious institutions such as churches, synagogues and a mosque also often have a lectern. More and more crematoria and memorial rooms provide guests with a lectern or a pulpit. But also in the entrance or lobby of a hotel or hospital guests are often welcomed behind a lectern. Wheel set can be optionally added to the lectern.

## PRODUCT DESCRIPTION

### **Gomez, stable, slim presentation furniture and lectern in white or black.**

Gomez is one of those products that finds strength in its simplicity. The strong metal base plate and body not only provide a solid base for the acrylic display sheet, but also ensure that this product actually fits everywhere. Because the product is so "simply" styled, it has a very pleasant pricing. This way you can have a pulpit or presentation piece of furniture that can serve for years to come without having to spend a fortune. You can use the product as presentation furniture in restaurants where you present a menu or a guest book. But you could also consider the product as an eye-catcher next to a reception desk or as a display for a product to be advertised at a trade fair or in a showroom. The product is available in white and black. Always suitable for any environment. With this lectern it is possible to order extra accessories to a limited extent. Think of a clip on reading lamp and a clip on microphone holder, a mobile platform for the chair and a cover. In this catheter we do not build in a signal and sound connection. If you wish to order a lectern with these capabilities, you can choose from the rest of our the extensive range on our websites.

A logo can be applied to the metal front plate. There is a space of 5 x 15 centimeters in the fuselage over the entire length to feed through cables. Gomez can be combined with another product from our series of tablet standards, namely the product Chiosco. Chiosco contains instead of a reading sheet a custom made housing to safely present a tablet theft. An interactive medium to better inform your customers about your great offer. Presentation furniture, podium and tablet stand, all in one setting.

# ACRYLIC LECTERN BRIDGE - SATINISED

---

## PRODUCT DESCRIPTION

Very stable wide lectern in plexiglass with clear or dual satin curved front panel

This very luxurious lectern is made of 12 mm thick clear acrylic with a 3 mm thick dual satin or clear front plate.

The wide base of the lectern provides special stability and allows for a wide reading plateau.

# ACRYLIC LECTERN BRIDGE - CLEAR

---

## PRODUCT DESCRIPTION

Very stable wide lectern in plexiglass with clear or dual satin curved front panel

This very luxurious lectern is made of 12 mm thick clear acrylic with a 3 mm thick dual satin or clear front plate.

The wide base of the lectern provides special stability and allows for a wide reading plateau.

# WOOD/ACRYLATE LECTERN ENSEMBLE - SATIN

## PRODUCT DESCRIPTION

Chic lectern made of a combination of wood and acrylic. You can choose between a clear or frosted front panel.

This luxury combined lectern in wood and acrylate is at home in any traditional or modern interior. By using a chic wooden base plate and reading panel in combination with a Plexiglas body, glass trays and front plate, the lectern becomes more of a design piece of furniture than a simple lectern.

The wood design is in walnut (veneer) and has a thickness of 18 mm. The plastic side panels and the glass panels (2) are made of 12 mm thick acrylic. The 3 mm thick front plate is placed on stainless steel spacers, which gives the presentation unit a very luxurious appearance.

By choosing the clear glass (plexiglass) front panel or the dual satin front panel, you can create a completely contemporary design that will surprise again and again. In the top, you can integrate an audio preparation with or without microphone, but also a surface-mounted LED lighting or a glass holder for a glass of water. The entire lectern is delivered by us with screws. We have chosen to do this because it is more solid than gluing and more resistant to shocks and to changes in the material due to temperature differences. Another advantage is the interchangeability of all parts. This makes the lectern usable for decades. Add accessories as desired to make the chair immediately usable. Think for example of a logo on the front or a microphone, of a cover or a flight case. Make it as easy as possible for yourself.

Chic lectern made of a combination of wood and acrylic. You can choose between a clear or frosted front panel.

This luxury combined lectern in wood and acrylate is at home in any traditional or modern interior. By using a chic wooden base plate and reading panel in combination with a Plexiglas body, glass trays and front plate, the lectern becomes more of a design piece of furniture than a simple lectern.

The wood design is in walnut (veneer) and has a thickness of 18 mm. The plastic side panels and the glass panels (2) are made of 12 mm thick acrylic. The 3 mm thick front plate is placed on stainless steel spacers, which gives the presentation unit a very luxurious appearance.

By choosing the clear glass (plexiglass) front panel or the dual satin front panel, you can create a completely contemporary design that will surprise again and again. In the top, you can integrate an audio preparation with or without microphone, but also a surface-mounted LED lighting or a glass holder for a glass of water. The entire lectern is delivered by us with screws. We have chosen to do this because it is more solid than gluing and more resistant to shocks and to changes in the material due to temperature differences. Another advantage is the interchangeability of all parts. This makes the lectern usable for decades. Add accessories as desired to make the chair immediately usable. Think for example of a logo on the front or a microphone, of a cover or a flight case. Make it as easy as possible for yourself.

# WOOD/ACRYLATE LECTERN LOUVRE - SATIN

## PRODUCT DESCRIPTION

Extraordinarily shaped pulpit with a combined design of both wood and acrylate.

This luxurious combined lectern in wood and plastic finds its place in every traditional and modern interior. By using a chic wooden base plate, side panels and readout panel in combination with a plexiglass glass-tray and front panel, the lectern becomes more of a designer piece of furniture than a simple lectern. The wood design is in walnut (veneer) and has a thickness of 18 mm. The glass trays (2) are made of 12 mm thick acrylic.

The 3 mm thick front plate is placed on stainless steel spacers, which gives the presentation cabinet a very luxurious appearance.

By choosing between the clear glass (plexiglass) front plate or the dual satin front plate, you can create a completely contemporary design that will surprise again and again.

In the top, you can integrate an audio preparation with or without microphone, but also a built-in LED light or a glass holder for a glass of water. The entire lectern is delivered pre-constructed with screws

We have chosen to use screws in this lectern because it is more sturdy than gluing, and it is more resistant to shocks and to changes in the material due to temperature differences. Another advantage is the interchangeability of all parts.

This makes the lectern usable for decades. Add accessories as desired to make the lectern immediately usable.

Think for example of a logo on the front or a microphone, of a cover or a flight case. Make it as easy as possible for yourself.

# METAL/ACRYLIC LECTERN PRESS

## PRODUCT DESCRIPTION

The flagship of lecterns from Bravour is the special design lectern PRESS. The highly successful design has a base plate, curb and supports made entirely of brushed stainless steel materials. The elegantly patterned side panels as well as the top are distinguished by being made of high-quality dual satin with acrylic. The resulting design not only has the characteristics of a highly professional lectern but also behaves like one.

The stately furniture is particularly stable. Not only a grip for the speaker but also an icon on stage. The attention of the, often highly placed, speaker is supported by a timeless design that meets all the primary needs of the speaker. The large reading desk has room to place three A4 documents on it. Or place a digital medium such as a tablet and/or laptop as additional support for the presentation. Still there will be enough space for documents, a glass of beverage, microphone and reading lamp.

The lectern stands on sturdy yet hidden feet. However, it can be placed on braked castors. These design wheels are discreetly concealed under the footplate. The PRESS lectern can be optionally equipped with a brushed stainless steel glass holder that lifts the viewing angle of the lectern. Even this detail is elegantly executed and a necessary addition to the already very beautiful lectern. On the large display, also called journal, there is more than enough room to place a connection for a microphone. In addition, a flexible adjustable reading light can be chosen. The cables go invisibly through the stainless steel body to the foot. In the foot is a transit through which the cables come out under the seat. From there the cables can be led in any direction.

And, if all else fails, on the front of the brushed stainless steel corpus there is more than enough room to place a company logo or statement.

With the PRESS lectern you get a presentation furniture that can fully compete with the lectern behind which the Prime Minister of the Netherlands and his colleague has addressed the Dutch people for months. By the way, this beautiful product, called Livorno, also comes from the assortment of Bravour®. It was designed a number of years ago by Rolf van der Laan. One of the top designers who has created a number of beautiful product solutions for Bravour® in the past.

# EQUAL WHEELCHAIR-FRIENDLY LECTERN

## PRODUCT DESCRIPTION

The height-adjustable lectern is a lectern that can be used in various ways. The built-in lift system allows the lectern to be adjusted to the desired height, making the presentation very pleasant. The lift system allows the lectern to be adjusted to 3 standard heights. In addition to these options, it is also possible to set a memorandum stand/height that you use often and that perfectly matches the height of each person who is presenting at that moment.

The EQUAL lectern is specially designed for wheelchair users, the wide design makes it easy to place the wheelchair in the middle of the lectern. This gives the wheelchair user a unique and fine positioning behind the pulpit. The top shelf allows multiple documents to be placed next to each other, making it easier to present them. The wide design of the lectern also makes it extremely stable and sturdy. With its sturdiness and height option, the EQUAL is a unique lectern.

The EQUAL lectern is not only suitable for wheelchair users, but also for standing speakers. Due to the different heights, the lectern can be set so high that you can stand behind it. If you are tired of standing, you can put the pulpit down and sit behind it. This allows you to use the pulpit in different positions and keep your audience focused. Furthermore, as shown in the picture, the pulpit can be updated with many other options such as: Microphone, glass holder and alarm clock (keeping track of time).

Additional accessories possible:

- Wired shock mount
- Gooseneck microphone
- Led lighting fixed on chair
- Clip led lamp
- Glass holder plastic
- No wheels!
- Logo on front
- Flightcase
- Wooden transport case
- No cover!

## PRODUCT DESCRIPTION

Sovereign is a lectern that is manufactured to the highest quality standards. The top may be divided into compartments in which you can place all kinds of equipment, but it can also be supplied as a closed top. Under the top is a spacious drawer where you can store a keyboard, documentation or other items. Under the drawer is 1 large cabinet with two doors mounted where you can mount a 19 inch rack for equipment or simply store all kinds of things that are necessary on stage.

The two large doors are easy to open and close by the click system, so the doors are well fixed and do not open automatically. The Sovereign lectern is made entirely of oak. This gives the lectern an elegant appearance that will look good in any room. With the spacious top you have enough space to place multiple documents next to each other which gives an orderly way during your presentation.

# SYNTHETIC LECTERN ENTERO - SATIN

## PRODUCT DESCRIPTION

This acrylic clear podium is supplied with a satin acrylic frontplate. The timeless design exudes confidence. The speaker has a grip and remains in the spotlight. The satin front panel hides the speaker somewhat but gives him enough exposure for interaction with the audience. The special price/quality ratio is unique and unparalleled.

### Entero

The Entero is a transparent lectern made of high quality acrylate, with a matte semi-transparent front plate of satin acrylate. Thanks to its transparent character, the Entero is ideal for presentations, conferences and events that focus on dynamics and interaction with the public. The matte front panel contributes to this by giving the speaker a somewhat hidden space to move behind the lectern without him disappearing completely behind the lectern.

The Entero also has two extra shelves on the inside that are spacious enough for the speaker to put documents or a glass of water.

Thanks to its mild pricing and its great value for money, this lectern is both accessible and suitable for all kinds of different parties such as schools and universities, but also for private companies, churches and conference-centres.

Like all of our other Perspex lecterns, the Entero is primarily a glued product, this sturdy fixing method has the advantage that the lectern is extremely durable and there are no screws or other attachments visible from the outside. In addition, thanks to the use of light materials, the Entero is lighter than many of our other lecterns, which ensures this product to also be suitable as a mobile presentation tool.

# AMIBILÈ ACRYLIC LECTERN - SATIN

## PRODUCT DESCRIPTION

A particularly pleasant looking lectern in a combination of wood and acrylate. The wood can be ordered in different colours. The front panel of the pulpit is placed on spacers which gives it a spacious and special design detail. The tapered side panels provide a slim design, but do not affect the stability of the lectern in any way.

## Amibilè

Modern and classic, stylish and playful, chic and warm, the Amibilè is a true fusion of different worlds. Thanks to the unique combination of two high-quality and durable materials, natural wood and acrylic, the Amibilè has a characteristic look that is guaranteed to fit in every setting. The fact that the wooden parts of the lectern are available in different sorts and colours only further enhances this versatility.

As a modern version of the classic pulpit, the Amibilè offers the speaker a platform that is both traditional and transparent. The tapered front plate and side panels give the lectern a slim and spacious design and due to the use of transparent materials in the base, front plate and platform, the Amibilè manages to provide every presentation with a dynamic aspect. It also facilitates direct interaction between the speaker and the audience by revealing every aspect of the speaker's posture.

The Amibilè also contains two shelves on the inside that allow the speaker to place attributes such as documents or, for example, a glass of water with him.

Thanks to the use of predominantly light materials, the Amibilè is a relatively light pulpit, which makes it ideal for use as a mobile presentation tool. With its modern appearance and warm character, the Amibilè is a lectern with an unprecedented appeal that is guaranteed to leave a lasting positive impression wherever it is used!

## PRODUCT DESCRIPTION

Rare is an acrylic lectern with a nice **slightly curved front panel**. Standard with a front panel that can be ordered in various colours or in transparent. This front panel offers enough space for any advertising messages or logos.

### Slightly curved acrylic lectern, Rare

Rare is a clear acrylic lectern as a design happened by accident. Sometimes this happens. You design something, don't really consider all shapes, built things together and think .... Oops, that wasn't meant to be. But after having another good look at the design we rather like the design as a nice model. It's a little too far forward placed **curved side panels** give the design a special touch. The reading plateau through has a different position, which is actually very user friendly. Its spaciousness created at the presenter's side is experienced as very nice. The viewer has the feeling the presenter is coming to him because of its forward slanting shape. The stability of the lectern remains however optimal. Special and scarce, hence the name "Rare". The lectern has a **sand blasted front plate** to which a beautiful full colour logo can be printed. You can choose a wider reading plateau and/or various accessories to be integrated in the reading plateau like an acoustic coupling for a microphone, a gooseneck light, and many more.

## ADDITIONAL INFORMATION

# BERLIOZ ACRYLIC LECTERN - CLEAR

## PRODUCT DESCRIPTION

The Berlioz is our most popular lectern, menu stand, or presentation podium — and for good reason. Its contemporary design features tapered, cut-out side panels and a curved front panel that subtly enhances the presence of the speaker.

The combination of clean lines and light-reflecting surfaces gives the Berlioz a unique, professional look that suits any environment.

Constructed using high-quality materials, including 12 mm thick components, the Berlioz offers excellent stability despite its lightweight build.

The clear-finish front panel can be customized with a logo or emblem, making it a great fit for brand-conscious settings. Its compact footprint is balanced by its striking visual appeal.

No wonder the Jaarbeurs convention center in Utrecht has chosen this model as the standard podium for all its venues.

You'll find the Berlioz everywhere — as a menu stand in restaurants and hotels, as a condolence register holder in funeral homes, or as a sleek reception and presentation stand in business environments

Wherever it's placed, the Berlioz adds a touch of elegance and functionality.

The Berlioz lectern can be customized with various options such as casters, AV and signal integration, a drink holder, and more. Contact us to explore the possibilities.

## ADDITIONAL INFORMATION

Total height	1250 mm
Printable area front panel	300 * 1000 mm

## PRODUCT DESCRIPTION

Our bestselling lectern/platform/console/menu stand, Berlioz, has a contemporary design. The side panels are partially cut out and **the front panel has a beautiful light curve**. These details appear to give this furniture and even the speaker a slimmer posture. The use of 12 mm thick parts provide sturdiness to the lectern.

### Lectern clear and frosted, Berlioz

Its tapered and **open side panels** or the Berlioz lectern creates a highly appreciated design or this beautiful pulpit. Not for nothing our bestseller in our series or acrylic lectern. Its modest size is amply compensated by the allure or its design. Its **frosted tapered front panel** gives you possibilities to place a beautiful logo. Therefore the exhibition centre Jaarbeurs Utrecht has selected this model as base unit for all its conference rooms. But this lectern we seem to find anywhere these days. Even used as a menu stand in a restaurant or hotel, as a condolences register holder in cremation centres or as presentation and reception desk at companies. Berlioz is successfully used in all places.

Berlioz is designed in a way that you can have all sorts of extras installed like castors, audio and other signal preparations, glass holders and a lot more. Ask for the possibilities.

# THOROS ACRYLIC LECTERN - SATIN

## PRODUCT DESCRIPTION

Perhaps our most beautiful design acrylic lectern/platform/console/menu stand in the product range. The particular lines in the construction, the front panel, the display sheet, they all provide this presentation stand an exceptionally chic radiance. I feature a glass tray and can standard can easily be provided with all kinds of accessories such as audio preparation, reading lamp and, for example, to be able to deploy braked wheels.

### Beautifully shaped acrylic lectern met frosted front panel, Thoros

Clear acrylic lectern Thoros is special by a number of details incorporated in the design. **Its curved slightly tapered front plate** for example. But also the beautiful **rounded reading plateau** and the **curved glass shelves** at the back of the lectern and not forgetting **the motif in its side panels** and foot print. All in clear acrylic details which you will find in no other pulpit. Its front plate can fitted with a logo or company name and the reading plateau gives you the possibility for acoustic couplings and signal connections. Cables are fed through a cable guide to its base where they are fixed in the bottom or the beautiful side panels by extensions cables (extra options) to your media centre.

## PRODUCT DESCRIPTION

The clear acrylic lectern Jasmine has a business appearance on a stage. The sleek design also helps shape a presentation. The front plate is standard made of clear acrylic. Also available in satin-coated opaque acrylic or, at an additional cost, in a coloured acrylic.

### Clear acrylic lectern Jasmine

The timeless lectern Jasmin can be used on any podium, in any restaurant and hotel and in any room. The classic shapes of this lectern make it possible to be used by anyone as a beloved piece of furniture. **The front plate can be supplied in both clear acrylic as also in satinized/frosted acrylic.** Its large surface area creates more than enough space to show a large logo or an extensive company name.

In the reading plateau you can integrate a number of extra options like a acoustic coupling for a microphone, a gooseneck LED-light, a xlr connection and for example a LED reading light.

## PRODUCT DESCRIPTION

The pulpit stand Arya stands for, authority. The **curved large front panel** gives stature, supporting the speaker/user as well. The thick acrylic parts determine its' strong base. One may expect this furniture to be a pleasure for a long time.

### Curved clear acrylic lectern Arya

The clear acrylic lectern Arya has a wide base and a wide reading plateau. The pulpit is supplied with a **convex clear or frosted front plate**. This creates a design which looks "bombastic" to the audience. The front plate of this lectern is however only 3 mm thick and therefore light weight. Its wide front plate gives you the advantage of presenting a nice large logo or company name.

The acrylic lectern is assembled from 12 mm thick plate parts, which has many advantages. If in future one of its panels might get damaged then it can easily be replaced for a new part. This way you save money in the long term. It also creates the possibility to have the front plate in a different colour or with a different logo. The base is constructed in a way to fit standard or braked castors underneath. In the reading plateau preparations can be made to fit audio and/or other signals now or later.

# HEIGHT ADJUSTABLE ACRYLIC/METAL LECTERN NOTULUS - BLACK

## PRODUCT DESCRIPTION

The lectern Notulus is made of partly coloured and partly clear acrylic. This wide-built lectern is made of a combination of colours and has multiple storage levels in the back. At the Notulus the angle of the reading plateau is flexibly adjustable and the height is adjustable.

### Modern lectern in wood and black acrylic, Notulus

Notulus is an all-round performer. The lectern is **electronically height adjustable** by means of a Linak® lift column. Its beautiful **thick frosted front plate** has a lot of space for a message and the reading plateau can house multiple connections. Furthermore a cabinet is placed behind its front plate with enough **space to place various equipment**. Standard the reading plateau has an XLR connection as an acoustic coupling for a microphone and braked castors are also pre-fitted underneath the lectern. Add to these standard options with accessories such as a stainless steel reading light, a drinking glass holder, an extra plateau for a laptop and a flight case and you will have a very well equipped pulpit at a very affordable price.

# METAL/ACRYLIC LECTERN ARENA - BLACK

## PRODUCT DESCRIPTION

The Arena is a beautiful, chic metal presentation furniture cum pulpit, consisting of a metal base with an acrylic finish for the reading platform, at a very accessible price.

The Arena is an ideal pulpit for any speaker. With the large reading tray there is room for several documents, tablets or laptops. The strong housing and the weighted footplate ensure a sturdy and stable lectern.

It is possible to order limited extra accessories with the Arena lectern. These include a clip-on reading lamp and a clip-on microphone holder. A mobile platform in front of the chair makes it easy to move the lectern.

De Arena is een mooie chique metalen presentatiemeubel annex spreekgestoelte, opgebouwd uit een metalen basis met een acrylaat afwerking van het leesplateau, voor een zeer toegankelijke prijs.

De kathedier is een ideale spreekgestoelte voor iedere spreker. Met het grote afleesblad is er plek voor meerdere documenten, tablets of laptops. Sterke behuizing en de verzwaarde voetplaat zorgen voor een stevige en stabiele spreekgestoelte.

Bij de Arena spreekgestoelte is het mogelijk om beperkt extra accessoires te bestellen. Denk hierbij aan een clip on leeslamp en een clip on microfoonhouder. Een verrijdbaar plateau voor het gestoelte waardoor de kathedier makkelijk te verplaatsen is.

# METAL LECTERN NEPTUNE BLACK

## PRODUCT DESCRIPTION

### Lectern Neptune Black

Neptune lectern is available in both wood lacquered and metal. The design is almost identical, except that the metal lectern has a different base. This changes the shape slightly, but the look and feel are the same. The tapering backwards front plate is an eye-catching detail in this chair. This shape gives the speaker more presence. The wide top plate of the metal version gives the chair more spaciousness. Neptune in metal is only available in silver-grey, stainless steel and black, but the front plate can be wrapped in any colour.

# HEIGHT-ADJUSTABLE PLASTIC LECTERN HILO - BLACK

## PRODUCT DESCRIPTION

Electronically height-adjustable catheter HiLo. Infinitely adjustable between 600 mm and 1100 mm. Available in matt black and white.

HiLo is a stable modern lectern that meets today's requirements for making a lectern available to any audience. The HiLo is adjusted in height by a Linak brand 12-volt lift and is easy to operate by means of a high/low button. Cables and equipment are neatly hidden in the base of the lift. The chic solution makes virtually no noise. On the large readout tray, we can install a shockmount already wired to the base for you if you wish. You can also add a reading light and all kinds of connections to this presentation furniture. This ensures that you offer a chic complete speaker furniture to the presenter.

Electronically height-adjustable speaking chairs are used in all places where a speaker wants to have a lectern at his or her disposal. In conference centres, in speaking rooms in hotels and meeting rooms in municipalities. But also in education and museums, electronic height-adjustable pulpits are a must. Educational institutions often use a presentation unit such as an electronic pulpit. Religious institutions such as churches, synagogues and a mosque are often equipped with a lectern. An increasing number of crematoria and memorial rooms provide guests with a lectern or pulpit. But even in the entrance or lobby of a hotel or hospital, guests are often received behind a lectern.

# METAL/PLASTIC LECTERN CONCERTO - WHITE

## PRODUCT DESCRIPTION

Concerto is not only used as a lectern, but also often as a music stand. The stable base ensures a stable stand. The large plastic reading surface (white or black) can be fitted with the option of inserting a tablet. The stand is manually adjustable in height. It is also easy to dismantle, making it easy to transport to other locations.

### Concerto lectern

Concerto is a multi-purpose piece of furniture. It can be used as a reading desk but also as a music stand. Its beautiful wide thick plastic reading panel makes it extremely suitable for use in any conceivable space. This beautiful product is also used as a menu holder in restaurants or a condolence register in a crematorium. Actually, it does not matter where you use the pulpit, everywhere it is a welcome functional and beautiful addition to the room. Add to this the fact that the price is very interesting, and you have an easy choice.

# ACRYLIC TABLE SPEAKER CHAIR HARDWELL - BLACK

## PRODUCT DESCRIPTION

This product is designed with functionality and ease of use in mind, so you can always work or study efficiently.

With its wide top, the table lectern is perfect for laptops, tablets and other electronic devices. Thus, you can easily work, study or even present without worrying about awkward positions or unstable surfaces. Moreover, the size of the table lectern is compact enough to take anywhere, so you always have a sturdy and reliable surface at your disposal.

But the table lectern is more than just a convenient surface for your devices. The unique footplate design gives the stand a stylish and modern look, making it a great addition to any workspace. In addition, the footplate is designed to increase the stability of the Table Talk Stand, so you can always be sure of a solid surface.

Whether you are working at home, in the office or on the go, the Table Lectern is the perfect solution for all your work and study needs. It is convenient, versatile and stylish, making it a great addition to your daily routine. Order the table lectern and turn your work or study area into a comfortable and productive environment!

# HEIGHT-ADJUSTABLE ACRYLIC LECTERN SIMPLE MOVE - WHITE

## PRODUCT DESCRIPTION

Simple Move is an entry-level lectern that meets the current requirements for making a lectern available to any target group. The Simple Move uses a 12 volt lift of the brand Linak and is easily operated by means of a high/low button. The cables and equipment are neatly concealed in the base of the lift. The chic solution makes virtually no sound. On the read-out tray a shockmount can be built in for you that is already wired to the base. You can also add a reading light to this piece of presentation furniture.

Electronically height-adjustable lecterns are used in all places where a speaker wishes to have a lectern at his or her disposal. In conference centres, in conference rooms in hotels and governmental meeting rooms. But also in education and museums, an electronically height-adjustable pulpit is a must. Educational institutions often use presentation furniture such as an electronic pulpit. Religious institutions such as churches, synagogues and a mosque also often have a lectern. More and more crematoria and memorial rooms provide guests with a lectern or a pulpit. But also in the entrance or lobby of a hotel or hospital guests are often welcomed behind a lectern. Wheel set can be optionally added to the lectern.

# WOODEN LECTERN RANA - OAK

## PRODUCT DESCRIPTION

The Rana exudes its timeless beauty through the use of beautiful oak wood material.

With its classic shapes and the natural look of the oak wood, the Rana adds a touch of elegance to any stage, restaurant, hotel or venue. The durable and sturdy oak construction ensures that this speaker chair will last for years and withstand daily use.

The large area of the wooden front panel provides more than enough space to display a large logo or an elaborate company name, presenting your brand in a professional manner. In addition, you can still add several additional options to the top of the Rana, such as an acoustic decoupler for a microphone, a gooseneck LED light, an xlr jack and LED reading lights, to meet your specific needs.

The Rana wooden lectern is a timeless and stylish piece of furniture that is excellent for all kinds of presentations, speeches and meetings. With its natural charm and functionality, the Rana provides a warm and professional look, allowing speakers and presenters to deliver their message with confidence.

# WOODEN LECTERN NASH - OAK

## PRODUCT DESCRIPTION

The side panels of the Nash are beautifully carved, adding to the prized design of this beautiful lectern. The sleek front panel with a subtle curve adds a touch of allure to the design and even gives the speaker a sleeker appearance, adding to the professional appearance of the presentation.

Using 12 mm thick components, the Nash is a very stable speaker chair that stays firmly in place during use. Its modest size is more than compensated by its unique appearance and the high-quality materials used.

The tapered and exposed design of the side panels adds to the aesthetic value of the Nash, making this model a popular choice. The oak tapered front panel offers opportunities to brand the reading desk with a beautiful logo or company name, presenting your brand in a professional and eye-catching manner.

The Nash was designed with flexibility in mind. You have the option of having all kinds of extras installed, such as wheels for easy movement, audio and signal prep for use with microphones or other equipment, a drinking glass holder and much more.

The Nash wooden lectern is a versatile piece of furniture that successfully lends itself to a variety of uses. Whether used as a lectern, lectern, menu stand, condolence register holder or presentation and reception furniture, the Nash always adds a touch of class and professionalism to any setting

# WOODEN LECTERN IZAR - OAK

## PRODUCT DESCRIPTION

The Izar features a beautiful slight curve at the front, adding a special touch to the design. The pulpit is made entirely of high-quality oak, giving it a timeless and elegant look that looks great anywhere.

The Izar's reading platform has a slightly different position, as the side panels are subtly curved forward. This gives the presenter a pleasant experience because it appears as if the lectern is leaning toward the audience. Despite this unusual design, the stability of the lectern remains optimal.

The front plate of the Izar is also made of oak and offers enough space to have a beautiful logo applied in full color, presenting your brand or message in a professional manner.

With the Izar, you have the option of ordering accessories that can be built into the top, such as an acoustic decoupler for a microphone, a gooseneck light, and more. This allows you to fully customize the Izar to meet your specific needs and provide the desired functionality.

The Izar wooden lectern is a very special and versatile piece of furniture that stands out for its exceptional design and functionality. Whether used as a lectern, lectern, or presentation and reception furniture, the Izar always adds a touch of uniqueness and style to any setting. With its durable oak construction, the Izar is a worthwhile investment that will last and leave a lasting impression on your audience.

# WOODEN LECTERN CAPELLA - OAK

## PRODUCT DESCRIPTION

The Capella is made entirely of high-quality oak wood, giving it a timeless and elegant look that can be enjoyed anywhere. With its curved round shapes and uniquely shaped curved top, the Capella has an aesthetically pleasing design that is appreciated by the public. The speaking desk has a large reading panel and two in-between platforms, which is convenient for placing, for example, a glass of water during a presentation.

The front plate of the Capella provides ample space for displaying a logo, company name or other expressions, presenting your brand in a professional and eye-catching manner.

With its durable oak construction, the Capella is not only aesthetically pleasing, but also highly functional. The wooden material provides stability and durability, while still making the lectern a lightweight and easy to move.

The Capella wooden lectern is a highly valued and versatile piece of furniture perfect for all kinds of presentations, speeches and meetings. Whether used as a lectern, lectern, or presentation and reception furniture, the Capella always adds a touch of class and elegance to any setting. With its beautiful design and options for additional built-in options, the Capella is a valuable addition to any venue.

# PLASTIC/WOOD LECTERN ZEUS - WHITE

## PRODUCT DESCRIPTION

The Zeus lectern is a harmonious fusion of plastic and wood, created to ensure a subtle yet impressive presence on stage. Its aesthetic design, with an eye for detail and functionality, makes it an exquisite choice for speakers who desire a stage element that combines style and ease of use.

The simple and sleek design of speaking chair Zeus integrates effortlessly into various environments such as lecture halls or official occasions, adding a touch of finesse without distracting from the main point.

With its generous top shelf and cleverly designed storage compartments, Zeus ensures that all necessary items for the speaker are within easy reach. Every detail has been carefully considered to support the speaker and ensure that nothing is left to chance.

The Zeus lectern accentuates its elegance through the refined combination of plastic and wood, supported by a robust base elegantly covered in matt, thick foamed PVC. Choices in colour can be coordinated down to the base and cabinet, with options for equal or different wood colour shades for a unique look.

Designed with the user in mind, the Zeus lectern offers a wide and deep top that provides enough space for all necessary materials, technology equipment, or custom built-ins such as microphones and other connections. Additional storage under the top surface is ideal for essential items such as a keyboard or documentation.

For smooth and easy movement, the Zeus speaker chair is equipped with a transport trolley as standard. This handy tool increases mobility and flexibility, allowing the lectern to be easily moved and adapted to different stage configurations.

Choose the standard version of lectern Zeus for an excellent balance between price and quality, or further personalise your experience with a range of available accessories that can be purchased separately to enrich and enhance your presentation capabilities.

With a promise of stylish design and reliable functionality, the Zeus lectern is a valuable stage element for both the experienced and novice speaker. Let your audience enjoy your message while the Zeus lectern stylishly and functionally serves as your reliable partner on stage.

# PLASTIC/WOOD LECTERN POSEIDON - BLACK

## PRODUCT DESCRIPTION

Enter the stage with confidence with the Poseidon lectern. This creation combines minimalist design with practical functionality, inspired by the essence of powerful presentations.

The Poseidon lectern is a seamless fusion of plastic and wood, with a sturdy base carefully encased in matte thick foamed PVC. Color choices extend to the base cabinet, with options for a matching or contrasting wood color cabinet.

This lectern is designed with the speaker in mind. The wide and deep top top provides ample space for documents, equipment and built-ins such as one microphone or other connectors. Below the top shelf are spacious compartments for storing a keyboard, documentation or other essential items.

The Poseidon lectern comes standard with a "transport platform" - a plate with wheels mounted underneath, making it easy to move. Although the cabinet can optionally be fitted with braked casters, the 'transport platform' provides an additional layer of mobility, ideal for dynamic stage setups.

When purchasing the Poseidon lectern, you can choose to receive it as a standard version, allowing us to offer very competitive value for money. For a more personalized experience, there are various accessories available that can be purchased separately to enhance your presentation experience.

The Poseidon lectern embodies a modern and simplistic design with a promise of reliable functionality. Whether you are an experienced speaker or a novice, Poseidon provides the perfect stage to get your message across. Its elegant design and high-quality construction make it a valuable addition to any stage, ready to impress any audience.

# PLASTIC/WOOD LECTERN ATHENA - BLACK

## PRODUCT DESCRIPTION

Lectern Athena is a compact and elegant lectern that perfectly combines style and functionality.

### Compact Design

The Athena is distinguished by its small, streamlined shape. With its compact dimensions, this lectern is ideal for smaller rooms or events where mobility and space saving are important. It offers the perfect balance of functionality and space-saving design.

### Robust Materials

Made from a combination of high-quality plastic and wood, the Athena provides a durable and stable base for all your presentations. The black finish gives it a timeless, elegant look that fits into any environment.

### Ease of use

This speaker chair was designed with comfort and ease of use in mind. The ergonomic height allows speakers of various statures to present comfortably. The flat top provides ample space for placing notes, laptops and other essential presentation materials.

### Versatile and practical

The Athena is not only a stylish piece of furniture, but also a practical addition to your conference room, auditorium or event space. Whether for business presentations, lectures, or ceremonial speeches, the Athena provides a reliable stage.

### Durability and Maintenance

The combination of plastic and wood not only provides aesthetic appeal, but also ensures longevity and easy maintenance. This speaking podium is designed to last for years, even with frequent use.

## PRODUCT DESCRIPTION

De Bris Soleil is een elegant en modern vormgegeven spreekgestoelte dat klasse en functionaliteit verenigt. Ontworpen met de moderne presentator in gedachten, is het gemaakt van hoogwaardig, doorzichtig acrylaat dat niet alleen een gevoel van ruimtelijkheid biedt, maar ook robuustheid en duurzaamheid garandeert. De lessenaar wordt gekenmerkt door zijn unieke waaierontwerp, met 8 tussenpanelen die afwisselend transparant en zwart zijn. Dit zorgt voor een dynamische en visueel aantrekkelijke uitstraling, die het publiek ongetwijfeld zal boeien.

Het zwarte acrylaat bovenblad vormt een stijlvol contrast met de doorzichtigheid van de rest van het gestoelte en biedt een stevig oppervlak voor notities, laptops of andere presentatiebenodigdheden. Dit topblad voegt een extra laag van verfijning toe en maakt het makkelijk om te integreren in elk interieur, van conferentiezalen tot auditoria.

De Bris Soleil is niet alleen een pronkstuk maar ook praktisch. Het is ontworpen om comfort en gemak te bieden aan de spreker, met een optimale hoogte en een ergonomische opstelling. De tussenpanelen fungeren niet alleen als decoratief element, maar bieden ook subtiele afscheidingen waarbinnen de spreker promotiemateriaal of persoonlijke items kan plaatsen, zonder dat deze zichtbaar zijn voor het publiek.

Dit kathedraal is de perfecte keuze voor diegenen die op zoek zijn naar een combinatie van esthetiek en functionaliteit, en die hun toespraak willen verheffen met een toneelbeeld van design en innovatie. De Bris Soleil is meer dan een spreekgestoelte; het is een statement dat zegt dat u waarde hecht aan uitstraling en prestatie.

# MOBILE PRESENTATION TROLLEY MHT62 FOR PROJECTORS AND LAPTOPS WITH TWO TRAYS FOR DEVICES TO 10 KG

## PRODUCT DESCRIPTION

This versatile, mobile presentation cart is the ideal solution for giving presentations, training and meetings in various business environments, such as conference rooms, schools, universities and hotels. The cart offers flexibility and control so presenters have all their essential equipment within easy reach. With two adjustable trays that can carry to 10 kg each, you can easily use a projector and a laptop at the same time. This makes the cart particularly suitable for situations where it is not possible to mount a projector or install a fixed lectern.

The top tray can rotate 360 degrees and is height adjustable from 850 mm to 1100 mm. This gives you the freedom to place your projector in exactly the right position for optimal projection. The bottom tray offers a tilt range of -35 to 35 degrees and can be adjusted in height from 700 mm to 950 mm (27.6 to 37.4 inches). This allows for comfortable positioning of the laptop or notebook for giving presentations or operating the projector.

### **Stable and durable design**

Thanks to its high-quality steel construction, this presentation cart is not only stable but also durable, even when used intensively in busy environments. The sturdy casters make it easy to move the cart to the desired location, and with two locking casters can securely lock the cart in place. This provides an extra layer of stability and security during presentations, adding to the speaker's confidence.

### **Flexible to use**

The mobile presentation trolley is easy to assemble and offers convenient tool-free adjustment options thanks to integrated thumbscrews. This makes it easy to quickly and safely adjust both the tilt and height of the trays to meet your specific needs. This flexibility ensures that you always have your equipment in the right place during any presentation or training session, without the hassle with tools or complicated adjustments.

### **Business Applications**

This cart is an excellent choice for businesses that often host presentations or meetings, such as training companies, educational institutions and hotels that offer conference facilities. The ability to place both a laptop and a projector on the same cart makes it easier to give visual presentations, even in rooms where fixed installation of equipment is not possible or desirable.

The ease with which the cart can be moved makes it ideal for use in different rooms within the same venue. Whether you are giving a presentation in a conference room or conducting a training in a classroom, this presentation cart provides for the mobility and flexibility needed, without sacrificing stability or ease of use.

### **Technical Specifications.**

- Weight capacity per tray: 10 kg
- Swivel angle per tray: 360
- Tilt range per tray: -35 to 35°

- Height adjustment upper tray: 850 - 1100 mm
- Height adjustment lower tray: 700 - 950 mm
- Total dimensions (L x W x H): 538 x 573 x 850 - 1100 mm
- Weight: 7.8 kg

With its robust construction, customizable features and user-friendly design, this presentation cart is a valuable addition for any business environment that values professionalism and flexibility.

# HOUT/METALEN KATHEDER MERCUR - EIKEN

## PRODUCT DESCRIPTION

De spreekgestoelte Mercur is één van de designs uit de chique 'Planets' serie. Dit hoogwaardige spreekgestoelte is ideaal voor elke locatie, van conferentiecentra tot religieuze instellingen. Het combineert luxe, functionaliteit en stijl in één elegant product.

Het Mercur spreekgestoelte is vervaardigd uit hoogwaardige materialen. De stabiele en duurzame metalen voet heeft een organisch ontwerp, waardoor er voldoende voetruimte is. De voet heeft een afmeting van 300 x 400 mm en is zwart structuur gelakt. De stevige metalen buis, met een diameter van 60 mm en een hoogte van 1050 mm, draagt bij aan de stabiliteit en duurzaamheid van het spreekgestoelte. Het afleesplateau is vervaardigd van 100% echt FSC-gecertificeerd warm eikenhout. Dit blad heeft een afmeting van 500 x 500 mm en een dikte van 30 mm.

Het afleesplateau biedt voldoende ruimte voor meerdere A4-documenten en heeft antislip eigenschappen. Daarnaast is het voorzien van een document afschuifstrip om te voorkomen dat documenten wegglijden. Voor optimaal gebruiksgemak is het bovenblad traploos verstelbaar van verticaal tot horizontaal, zodat u eenvoudig de ideale leeshoek kunt vinden. De kanteling kan worden gefixeerd met een inbussleutel of vertraagd worden ingesteld. Het spreekgestoelte is eenvoudig zelf te monteren met behulp van 6 bolkopschroeven.

Het Mercur katheders is perfect voor diverse locaties en doeleinden. Het is ideaal voor presentaties en lezingen in spreekruimtes en conferentiecentra. In crematoria biedt het een respectvolle en professionele uitstraling, terwijl het in religieuze instellingen geschikt is voor diensten en toespraken. In scholen is het spreekgestoelte perfect voor lezingen en presentaties in een educatieve omgeving.

# WOOD/METAL LECTERN MARS - NUTS

## PRODUCT DESCRIPTION

The wooden/metallic lectern Mars from the 'Planets' series offers a perfect combination of style, durability and functionality for various use environments such as conference centers, schools, religious institutions and crematoria. This lectern features an elegant design that exudes both modernity and traditional charm, blending seamlessly into any interior.

The sturdy construction of the Mars lectern begins with a sturdy metal base, finished in a fine black textured paint that ensures stability and durability. The base measures 300 x 400 mm, provides ample foot space and has an organic design that provides a stylish look. A sturdy metal tube 60 mm in diameter and 1050 mm high carries the reading tray, making the construction both solid and aesthetically pleasing.

The reading tray itself is made of high-quality 100% FSC-certified warm walnut, known for its rich appearance and longevity. The tray has a dimension of 500 x 500 mm with a substantial thickness of 30 mm, providing enough space to accommodate multiple A4 documents. Moreover, it is equipped with non-slip features and a document shear strip to prevent papers from slipping while speaking.

For an added dimension of ease of use, the tray is infinitely adjustable from a vertical to a horizontal position. This allows the user to easily find and adjust the perfect reading angle. The desired position can be locked with an Allen wrench or adjusted with a delayed tilt, contributing to a comfortable and ergonomic experience during presentations or lectures.

The Mars lectern is not only functional but also easy to assemble yourself. With only 6 ball head screws, it can be set up quickly and easily, making it ideal for venues that require flexibility in their furniture.

This lectern is therefore an excellent choice for anyone looking for a combination of luxury, functionality and a professional look. It is suitable for a wide range of events and venues, always ensuring a respectful and impressive presence.

# WOOD/METAL LECTERN MARS - OAK

## PRODUCT DESCRIPTION

The wooden/metallic lectern Mars from the 'Planets' series combines style, durability and functionality, ideal for conference centers, schools, religious institutions and crematoria. The elegant design, with a sturdy metal base in black textured paint, offers both stability and a modern look. The base measures 300 x 400 mm and supports a 60 mm diameter and 1050 mm high metal tube, on which rests a 500 x 500 mm reading tray made of 100% FSC-certified oak.

This platform is 30 mm thick, equipped with non-slip properties and a document shear strip, making it spacious and practical. The stepless adjustability of the tray, from vertical to horizontal, allows the user to set the ideal reading angle. This makes the lectern ergonomic and user-friendly, especially for longer presentations or lectures. The desired position can be easily fixed with an Allen wrench, adding to comfort and stability.

The Mars lectern is easily assembled with just six ball head screws, making it ideal for use in environments that need quick and flexible set-up. In conference centers, it provides a professional stage for presentations and seminars, while in schools it helps teachers support their classes. Religious institutions can use it during services and ceremonies, where the classic oak creates a respectful atmosphere. It is also a valuable addition in crematoria during memorial services, offering a dignified presentation of speeches and memorial texts.

## PRODUCT DESCRIPTION

De Katheder Fire is de ideale spreekgestoelte voor een onvergetelijke bruiloft. Dit stijlvolle en moderne meubelstuk, vervaardigd uit hoogwaardig acrylaat, voegt een vleugje elegantie toe aan elke ceremonie. Het unieke ontwerp, met een prachtige mix van transparant en satijnachtig acryl, zorgt voor een strakke en verfijnde uitstraling die perfect aansluit bij de romantiek en pracht van de trouwdag.

Dit meesterwerk is niet alleen een functioneel element voor het uitspreken van geloften, toespraken of lezingen, maar ook een echte blikvanger die het geheel naar een hoger niveau tilt. Het gebogen blad aan de zijkanten en het fraai vormgegeven leesplankje maken het een gebruiksvriendelijke, maar visueel verbluffende toevoeging aan de bruiloft.

### Waarom kiezen voor de Katheder Fire voor jullie bruiloft?

- **Exclusieve uitstraling:** Een prachtig ontwerp met een combinatie van transparant en satijnachtig acrylaat, ideaal voor de luxe uitstraling van een trouwceremonie.
- **Elegant en praktisch:** De gebogen zijkanten en het sierlijke leesplankje zorgen voor zowel schoonheid als gemak tijdens het spreken.
- **Een blijvende indruk:** Dit spreekgestoelte is een unieke aanvulling die niet alleen functioneel is, maar ook het decor van jullie speciale dag verrijkt.
- **Flexibiliteit:** Naast de stijlvolle basis zijn er tal van accessoires beschikbaar om de lessenaar naar wens aan te passen.

Laat de Katheder Fire het middelpunt zijn van jullie geloften en toespraken - een prachtig symbool van de eenheid die jullie samen vieren.

# IN HOOGTE VERSTELBAAR LED METALEN/KUNSTSTOF KATHEDER DIMITRI

## PRODUCT DESCRIPTION

Dit in hoogte verstelbare spreekgestoelte combineert modern design met gebruiksgemak, en is de ideale keuze voor iedereen die een professionele en visueel aantrekkelijke presentatie wil geven. Of het nu gaat om een bedrijfsconferentie, een lezing, een kerkdienst of een verkoopbijeenkomst, dit spreekgestoelte biedt de perfecte balans tussen stijl en functionaliteit.

Gemaakt van hoogwaardig materiaal, biedt dit spreekgestoelte een robuuste en stabiele basis die bestand is tegen dagelijks gebruik in drukke omgevingen. Het verstelbare ontwerp maakt het mogelijk om de hoogte aan te passen aan de spreker, zodat iedereen comfortabel kan presenteren. De geïntegreerde LED-verlichting voegt een eigentijds tintje toe en trekt de aandacht subtiel naar de spreker, wat vooral handig is bij grotere evenementen of in ruimtes met gedimd licht. Deze verlichting kan worden aangepast om de gewenste sfeer of toon van de presentatie te versterken.

### Kenmerken en Voordelen:

- **Verstelbare hoogte:** Dankzij de eenvoudig te bedienen hoogte-instelling kunnen sprekers van elke lengte zich comfortabel voelen. Dit maakt het spreekgestoelte geschikt voor verschillende locaties en gebruikers.
- **LED-verlichting:** De ingebouwde LED-verlichting geeft een verfijnde uitstraling en zorgt ervoor dat het podium en de spreker altijd op de juiste manier verlicht zijn. Dit voegt een moderne flair toe en maakt het geheel visueel aantrekkelijker.
- **Duurzaam en robuust:** Het ontwerp is vervaardigd uit hoogwaardige materialen, wat zorgt voor een lange levensduur en stabiliteit tijdens intensief gebruik.
- **Geschikt voor diverse evenementen:** Of het nu gaat om zakelijke bijeenkomsten, conferenties, kerkdiensten, of presentaties in onderwijsinstellingen, dit spreekgestoelte past perfect in iedere setting.
- **Stijlvol en modern ontwerp:** De strakke lijnen en het minimalistische ontwerp zorgen voor een professionele uitstraling die in elke ruimte een indrukwekkende indruk maakt.

### Toepassingen:

- Bedrijfsconferenties en presentaties
- Lezingen en seminars
- Kerkdiensten en religieuze evenementen
- Verkoopbijeenkomsten en productpresentaties
- Onderwijsinstellingen en schoolvergaderingen

Met dit verstelbare spreekgestoelte investeert u in een veelzijdig meubelstuk dat niet alleen praktisch is, maar ook bijdraagt aan een professionele en moderne sfeer. De aanpasbare LED-verlichting en verstelbare hoogte maken het geschikt voor allerlei verschillende situaties en sprekers, terwijl het strakke ontwerp altijd een elegante indruk achterlaat.

## ADDITIONAL INFORMATION

Warranty	2 years
Color	White
Material	Acrylic, Metal

Weight	10.000000
Specifications	Height adjustable
Height adjustable	From 600 mm to 1200 mm
Base plate	350 * 350 mm
Reading platform	500 * 400 mm
Height to reading platform	1050 mm
Total height	1150 mm

## PRODUCT DESCRIPTION

The lectern/lectern/menus stand Sinope exudes authority. The convexly curved large front plate gives the impression of firmness, the positive additional effect for the speaker or user. The thick Wooden parts are decisive for the strong base. You can expect a long pleasure of use.

## Lectern Sinope

The Wooden Plastic lectern Sinope has a wide base and a wide reading platform. The lectern comes with a forward curved wooden front plate. This creates a design that makes the chair appear "bombastic" to the audience. However, the front plate of this speaker chair is only 3 mm thick and so light in weight. The wide front plate gives you the advantage of presenting a nice big logo or a company name.

The Wooden lectern is screwed from 12 mm thick plate parts, which offers many advantages. If in the unlikely future a part gets damaged, you can easily exchange it with a new part. This will save you a lot of money in the long run. It also gives opportunities to change the front plate to a different color or with different logo. The base is constructed so that fixed feet or braked wheels can be put under it if desired. Provisions can be made in the top plate to place audio and/or signal preparations immediately or in time.

Height to reading platform	1050 mm
Total height	1250 mm
Printable area front panel	400 * 1000 mm

# WOOD LECTERN MAJESTIC - OAK COLOR

## PRODUCT DESCRIPTION

The lectern **Majestic** is an absolute asset for any room where presentation, authority and style come together. With its warm wood finish in a light oak hue and the clean, minimalist design, this lectern radiates calm, class and reliability. The combination of thoughtful details and solid build quality makes this lectern the perfect choice for conferences, educational institutions, churches, council chambers and other professional settings.

### Thoughtful design to in the details

From the front, the Majestic reveals itself as a sleek and powerful block with a modern look, perfect for drawing the audience's attention to the speaker. The back, however, reveals its true strength: three spacious shelves provide for a practical and well-organized workspace. There is more than enough room for documents, equipment, a glass of water or personal items. The shelves feature cutouts for cable management, so everything stays neatly and safely stored.

There is a discreet cutout under the center of the top shelf where cabling for a microphone, reading light or other audio/video solutions can be neatly concealed. Cables are routed through the robust internal construction - completely out of sight - and only reappearing at the bottom. The back plate of the metal core is easily removable with m6 bolts, providing quick access for maintenance or upgrades.

The top edge is tilted slightly toward the speaker for optimal reading comfort. Optionally, the lectern comes with a flexible gooseneck microphone holder - as visible in the photo - that easily adapts to any speaker.
