Bravour® BR5 charging lockers

5 devices up to 16 inches

The Bravour BR5 charging locker provides secure storage and charging for different types of devices. Designed specifically for schools and businesses, the cabinet has 5 individual compartments. Each compartment includes a power socket and a USB-C port with 45 W output.

Two locker types are available: compact versions ideal for placing on a desk, and models with large compartments.

Key benefits

- + Secure charging and storage for 5 devices
- + Suitable for smartphones, tablets, Chromebooks, laptops, e-bike batteries and other mobile devices
- + Lockable compartments with a key lock, digital code lock or combination lock
- + 1 power socket and 1 USB-C port with 45 W output per compartment
- + Key lock, digital code lock or combination lock
- + Available in a compact version or with large compartments

About Bravour®

Bravour develops and supplies professional solutions for charging, storing and managing mobile devices. Since 2010, we have helped schools, businesses and organisations choose solutions suited to their needs.

Product expertise

A specialist range of professional solutions for everyday use in schools and workplaces.

European support

Multilingual advice and sales support for organisations and partners throughout Europe.

Project-specific solutions

Configurations for different device types, capacities, charging methods, security levels and operating environments.

A solution for every need

Education

Charging and managing shared classroom devices.

Business & IT

Centralised solutions for laptops, tablets and professional equipment.

Public spaces

Secure storage and controlled access to devices.

Training & mobility

Portable solutions for devices used across multiple locations.

PRODUCT PORTFOLIO

Four product families. One charging strategy.

Choose the right solution based on device mobility, users and storage location.

Charging carts

A mobile solution for classrooms and transporting devices between rooms.

TECHNOLOGY

Charging technologies and operating modes

Choose the charging solution that suits your devices, IT policy and user habits.

**USB-C charging / USB-C PD**

Selected models charge modern laptops and tablets through compact, reversible USB-C connectors.

**Power socket charging**

Solutions with power sockets charge different devices using their original adapters.

**Charging & synchronisation**

Some solutions can configure and synchronise multiple devices as part of tablet fleet management.

**Smart charging options**

Scheduling, charge management and intelligent power distribution keep devices ready for use.

**Ventilation**

Ventilated storage systems dissipate heat more effectively when several devices charge at once.

**Locking systems**

Depending on the model, options include a key lock, digital code lock, combination lock or RFID.

**Public or private use**

Our RFID and digital code locks support public or private operation of your charging solution.

SECURITY

Choose your locking system

Our charging solutions provide secure storage and controlled device access in schools and professional environments. Different locking systems are available to suit your needs.

**Key lock**

Simple and efficient management in supervised environments.

**Digital code lock**

Convenient access without distributing keys. Public and private modes available.

**Combination lock**

Reusable access solution for offices and professional environments.

**RFID / Online management**

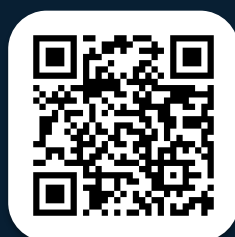

Advanced access management for private users, public mode and institutional deployments.
