ZIOXI

PRODUCT CATALOGUE
Smart Furniture
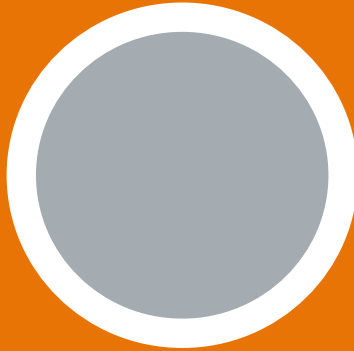

Welcome to the zioxi catalogue

Smart furniture for agile spaces.

zioxi designs and manufactures innovative, intelligent and connected furniture products that seamlessly integrate with technology. We enjoy solving problems through design, producing inspiring products that can be used to create practical yet stunning, multi-functional spaces.

We work with some amazing customers across education, public and private sectors to help create wonderful learning, training and working environments. Take a look at our **Case Studies** on pages 131-141 for inspiration.

We're always innovating to add great new products and continuously improve the ones we already have. We've added our new robust, one piece carry baskets to our iPad Charging trolley range (page 17), RFID access card lock options across pretty much all products, **onView** Smart Control to Gripcase and Basket trolleys (page 14 & 19) and we're rolling out our exciting new patented **oneClick** cable port across all our lockers, cabinets and trolleys.

Hopefully you've already seen our stunning new **Volt charging lockers** with different sizes and capacities for laptops, Chromebooks, iPads and phones. And now with the launch of **onView** for Volt lockers, they just got a whole lot smarter. Access is controlled via RFID card with web portal management of users and locker allocation. Locker modes can be changed from Private, Public or Loan at a click of a button. App users can find, reserve, open and return lockers; be notified automatically of issues and report service issues. You also get a full history of who used each locker, locker issues, usage patterns and even power consumption. And there's lots more - see pages 29 to 36.

And if you're looking for ways to reduce carbon emissions, then take a look at the latest enhancements to our **onView** Smart web management portal. The system reports in real time how much power your lockers, charging trolleys, powerHubs, AV lecterns, IT desks and tables are consuming and the amount of carbon emitted as a result of your local electricity generation. onView can also assist you in reducing your carbon footprint by minimising usage and automating the task of controlling power consumption to be at the greenest times of day & night.

Connecting Furniture with Technology - That's the **zioxi** touch.

About zioxi

Connecting Furniture with Technology.

Our smart furniture products are designed to meet the ever changing needs of technology. Our innovative, leading edge designs provide solutions for charging, integrating, securing and controlling IT and AV technology within charging trolleys, lockers, desks and tables. Solutions that enable the latest workplaces and learning spaces to perform to their maximum, always ready, always technology enabled.

We manufacture in the UK, assemble at our Oxfordshire sites and distribute our portfolio of products throughout Europe and beyond to industry leading time scales. We take great pride in the creativity of our designs, the quality of our build, the low carbon footprint of our products and the efficiency of our service.

We are always here to help find a solution.

"zioxi have delivered great quality products that sit very well within the overall design of the building."
Mike Othick,
Leeds Trinity University

zioxi Chromebook Trolleys "They are well designed and extremely budget friendly."
Paul Heather, Network Manager
Lakes Academy Trust

"The organisation, communication and customer care were second to none"
Leigh Wolmarans, Head Teacher.
Lings Primary School

Contents

Integrated ICT Teaching Space

Multipurpose spaces with IT integration

Gone are the days of traditional IT rooms, people now need multi use areas. Workspaces now include areas for collaboration, group work, individual working and flexible desks for larger groups. **zioxi** collaborative tables are perfect for this environment with a screen at one end to share work. t41 tables provide flexibility for group working with rechargeable powerHubs to support BYOD. P1 and M1 integrated desks providing IT or IT free workspaces, switching with ease.

Learning Resource Centres

Modern Libraries and Learning Spaces

The recent move towards the use of mobile devices means that learning resource centres now need to be more multifunctional than before. Not only do they need to provide functional storage for books but also lots of different areas that encourage group work or one to one research with mobile devices.

The Showcase Classroom

Inspiring, creative & Interactive

The showcase classroom is an inspiring, creative and interactive learning environment. It's important to include lots of different areas to encourage different styles of learning and support the use of a wide range of ICT. Colourful glass panels and flexible furniture encourage spontaneous creative thinking and group brainstorming.

ZIOXI onView

Control your furniture over the web!

We believe furniture should be intelligent and now with the integration of **onView** it is! **onView** is a web based platform for the control and monitoring of any **onView** enabled furniture item using a mobile app or computer.

onView can help...

Save Money by automatically turning off power when it's not required or by prolonging battery lives of mobile devices.

Improve security by locking away monitors at night or alerting you if a charging trolley isn't locked.

Go green through automatically charging mobile devices or rechargeable powerHubs at times of lowest carbon intensity electricity generation.

Increase student satisfaction by providing students with real time desk & table availability on their phones or finding and reserving charging lockers and loan devices.

Reduce staff time by automating tasks and providing alerts only when intervention is required.

Improve utilisation by providing data on power consumption, asset use, location and state.

These are just a few of things that **onView** can do to help. What can **onView** do for you?

t41 Family

The original and best agile student table. In rows, waves, clusters or circles you can have any layout you like. Or flip the top up and nest them together to clear a space – you're in control.

t41 Individual Student Table 60°

For agile and adaptable learning spaces

In rows, waves, collaborative groups, clustered round a mobile power and/or data hub for ICT or stacked horizontally to clear a space, t41 responds to the unique demands of each lesson.

60° version allows six t41s to cluster in a circle around a **zioxi** Rechargeable powerHub (see page 39).

For classrooms, breakout spaces and libraries.

zioxi t41 Roundel – perfect stationery solution for centre of t41 tables.

The zioxi touch

Why do people choose zioxi products?
What makes our products special?

The zioxi touch

Why do people choose zioxi products?
What makes our products special?

It comes down to our people.

We have teams of dedicated, talented people, passionate about their work to design, manufacture and assemble the best products to meet your needs, wherever and whenever technology and furniture meet.

We design our products at our headquarters in Oxfordshire with a level of innovation and design led thinking that keeps **zioxi** ahead of the rest. Our products are manufactured and assembled in our dedicated factories to ensure you receive the best products in lead times to make you smile.

Our customer service teams are experienced and devoted to helping you choose the best products to meet your needs. They will see you through from purchase to aftercare and everything in between with great attention to detail. Our operations team will ensure that you get your order on time and in the right place.

It's the **zioxi** touch. And here you can learn more about what we do and how we do it.

01 We Listen

Your needs may be unique, and you may have a solution in mind. The first step for us is to listen, so we understand what you want to achieve. With experience we show you the best product options and help you if you need something special.

02 We Plan

If you are having a product that has technology attached, inserted or integrated within, then there are many things that need to be considered. We make sure that the size is right, the power is right and the connections and controls are all possible, so that your products work perfectly once delivered.

03 We Deliver

Everywhere. Last year we delivered to 42 countries with a mix of standard and bespoke products, often installed by our customers and partners with assistance from ourselves whenever needed. We want your order, your delivery, and your installation to be right first time and we'll always be there to support you thereafter.

04 We Care

As a company we use our onView system to reduce our emissions and carbon footprint. We segregate all our manufacturing waste for recycling, and we comply with the WEEE, Battery and Packaging waste directives. We are certified under the ISO 14001 international environmental management standards.

Case Studies

The proof of the pudding. The evidence. This is what it looks like in the real world. Real life case studies from five of our recent projects.
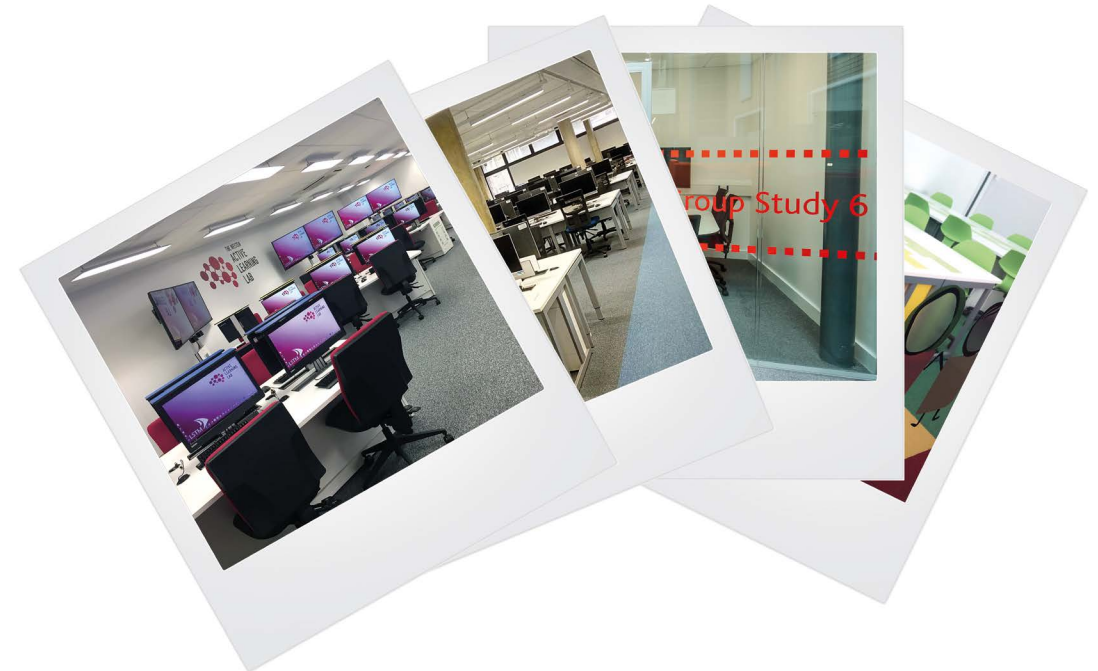

The Gordon College of Education

> The spaces are designed so that each learner can find his or her own convenient way to develop, using the most innovative technologies available.
>
> Limor Harari, Head of the Centre for Innovation and Technology.

Gordon Academic College is the oldest Teacher training institution in Israel and is a leader amongst Israeli education centres when it comes to integrating technology.

With the construction of a new 5000sqm teaching facility, Gordon College asked **zioxi** to work with them to design their new futuristic learning spaces.

zioxi enabled Gordon College's desire for collaborative learning by designing teaching spaces to include a variety of P1 Computer Desks and Collaborative Tables of different sizes and shapes. In the Immersive

Learning Space, zioxi used Height Adjustable Collaborative Tables so students could sit or stand, and the integrated AV media enabled team collaboration around a shared display using students various devices. Student breakout spaces were created in the classrooms as well as corridor spaces with the use of s41 Hug Seats and s41 wired hubTables.

Throughout the college zioxi used the student T chair in various colours to compliment the vibrant colour scheme and reconfigurable s41 wedge stools were added in some classrooms to create a more relaxed and comfortable place to learn.

www.zioxi.com

Leeds Trinity University

> "We were looking for an enthusiastic company to help us deliver specialist furniture solutions for our new learning spaces. We have certainly found that enthusiasm for zioxi."
>
> Mike Othick, Media Services Manager.

Leeds Trinity University leads the way with collaborative teaching areas and integrated AV technology. zioxi worked with Leeds Trinity and their AV integrator to install zioxi collaborative tables full of specialist AV equipment in the Andrew Kean Learning Centre.

We kitted out the Collaborative Room, which needed to accommodate over 50 students in a flexible layout. Collaborative tables were installed including sections with height adjustability to accommodate wheelchair users. A further nine Collaborative Tables were placed in group rooms. The design slightly
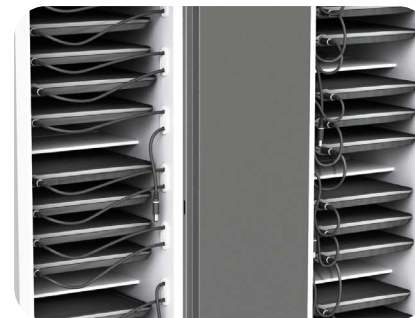

different to match the environment, but all have the same look and feel for consistency.

Leeds Trinity also required an IT teaching space for its digital courses – the rooms needed to be able to flip between a general teaching space and an IT suite. Equipment needed to be hidden away when not in use to create a multipurpose space.

zioxi installed hideaway desking products including M1 manual hideaway desks, powerUp hideaway desks and height adjustable option.

Lakes Academy Trust

> "They are well designed and extremely budget friendly."
>
> Paul Heather, Network Manager
> Lakes Academy Trust,

Lakes Academy Trust's Network Manager, Paul Heather, first saw our trolleys at the Bett show and has been using them ever since.

"I saw the trolleys at the Bett show and loved the design. In the past I used to always go with a leading competitor but when looking to make a move to Chromebooks within the school their offerings were just to big, heavy and expensive for use in the classrooms. The **zioxi** solutions were compact, meaning I could integrate the Chromebooks easily in the classrooms. They are well designed and extremely budget friendly."

"The front access panel for adding the chargers is well thought out, as is the cable ports and caps which mean the cables are kept very tidy. They are quite light weight (for a laptop trolley) They look great and the integrated handles work well too."

"I find the customer service to be exceptional. When I took over the support of another school who had some old **zioxi** trolleys, **zioxi** sent over all the bits I would need to sort them out, no question and for free! Something a lot of education suppliers should take note of!"

Seymour Park Community Primary School

" It is the most incredible space and we are really grateful to zioxi"

Anthony Rae, Head Teacher.

zioxi worked with Seymour Park Community Primary School in Manchester to create a brand new state-of-the-art IT suite.

The brief was to completely revamp a large IT room drawing inspiration from innovative tech spaces such as Google. The new space houses 30 computers, acoustic Teacher's pod, flexible classroom area and a Reading/ iPad hideaway. **zioxi** designed the IT zone with P1 desks where monitors go up & down at the touch of a button or remotely by using **onView**. The flexible zone combines easy to reconfigure soft seating and hubTables with powerDomes so the students can plug in their

devices, a TeacherWall where there's space for display screen, storage & laptop charging bays, and a CubeWall with a reading & recording hideaway designed to provide a quiet place to learn for students that are easily distracted.

An acoustic pod provides teachers with a quiet place to mark work or hold meetings whilst doubling up as a quiet space for children to record podcasts for digital projects. The colour scheme in the whole space is bright, bold and inspiring.

It was a real pleasure working with Seymour Park on this project and they are very pleased with their fabulous new learning space!

Liverpool School of Tropical Medicine
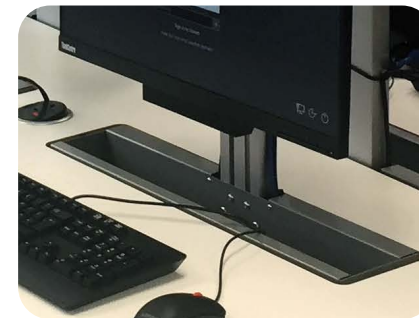

> Zioxi M1 collaborative desks were the chosen solution for the school's Active Learning Lab.

Liverpool School of Tropical Medicine were looking for integrated technology furniture for their new Active Learning Lab.

Active learning encourages deeper thought, analysis and collaboration in order to strengthen learning and requires furniture that facilitates this. **zioxi** integrated M1 collaborative desks were the chosen solution.

Seven M1 desks were positioned around the room in a circular configuration each accommodating eight students. Dual screens were installed at the end of the desks allowing the students to collaborate together by sharing images from their screen with the other students at their own collaborative desk or around the training room.

The space needed to be multipurpose with computers provided for student use. These computers also needed to be hidden away when necessary to allow for laptop use within the space. The M1 mechanism is the perfect way to do this. Simply press to reveal the monitor, mouse and keyboard, which all rise out of the desk ready for a learning session.

Different colours were used to differentiate each bank of desks and comfortable chairs were added to finish off the space.

The zioxi Guarantee

Our furniture is designed to withstand educational environments. We use materials, components and manufacturing methods that make our products a cut above in terms of quality.

That's why we offer the following as standard.

10 years

A decade. That's our standard guarantee on all products with no moving or electrical parts.

5 years

Five years is our guarantee on products with moving parts like hinges, castors, cranks and other mechanisms and all soft seating products.

2 years

All electrical components within our products are guaranteed for two years.

Standard Guarantees

What happens if there is a problem?

If any defect, malfunction or failure occurs which is not the result of abuse, accidental damage, inappropriate use or mishandling, we will repair or replace the part or product free of charge. This guarantee is subject to terms and conditions which you can find on our website at www.zioxi.com

All product guarantees are detailed on the individual product specifications so please check these if in doubt. These can be found on our website www.zioxi.com or give us a call and we will happily discuss.

Proper Job!

We take pride in doing things properly. Our accreditations and furniture industry memberships can be found below:

ISO 45001:2018
It's important to us that we provide the best possible working conditions for our lovely team. OHSAS 45001 helps us with policies, procedures and controls to help ensure everyone's health and safety.

ISO 14001:2015
We believe its important to look after the environment and ensure that we are working in sustainable ways. Our ISO 14001 certification shows that we are actively working with this in mind as part of our environmental management system.

ISO 9001:2015
We love our customers and want them to have an amazing customer service experience with us. We are ISO certified and have a comprehensive Quality Management System.

FIRA (Furniture Industry Research Association)
As a member of FIRA we are part of the UK's largest furniture association. This allows us to ensure our furniture design and construction meets all the necessary standards.

Customer Service

Zioxi and Bravour are renowned for superb customer service. We don't simply deliver and run.

We make sure it fits and that you know how it works. If you have any questions we will do our very best to help. To ensure we get it right first time please give us as much information as possible, including:

- Specification – have you specified colour and size?

- IT specification – if you are ordering products into which you are integrating IT, you need to tell us the specification of the equipment that's going into it, including CPU/monitor size.

- Contact details - name and number of the person who will be taking delivery.

- Out of hours – if you are taking delivery or booking an installation out of hours, eg during school holidays, we need contact details (name and mobile phone number) of the people who will give us access to the site.

Catalogue guide

Product requires on-site installation

Product will stack to quantity indicated above

All measurements indicated = cm Width (W) x Depth (D) x Height (H)

Delivery

Lead times – most products are available six weeks from order. Actual delivery date will be confirmed once order has been processed.

Besides exceptions, delivery charges are included in the price.
It is assumed that products are delivered to either kerbside or for project installations to the ground floor. Reasonable vehicular access is required and we reserve the right to add supplementary charges if access is dificult.

For project installations, if delivery is to anywhere other than the ground floor please advise if there is lift access and the dimensions of the lift. It is essential that we know these details to

Installation

zioxi IT desks, cupboards, cabinets, lockers and trolleys are designed to accommodate most proprietary hardware. When ordering, please advise the specification of the kit you intend to install so we can confirm that it will fit.

IT hardware and accessories are not included in the price.

Standard delivery does not include the installation of hardware, cabling or accessories in any of the zioxi IT desking products. If you require installation there will be an additional fee. Please ask for details.

Terms and Conditions

Please see www.zioxi.com for full terms and conditions.

Continuous Improvement

Due to variation in materials, developments and improvements in design, we may alter the specification and appearance of our products from time to time without notice.
