Securo wall stand

Securo

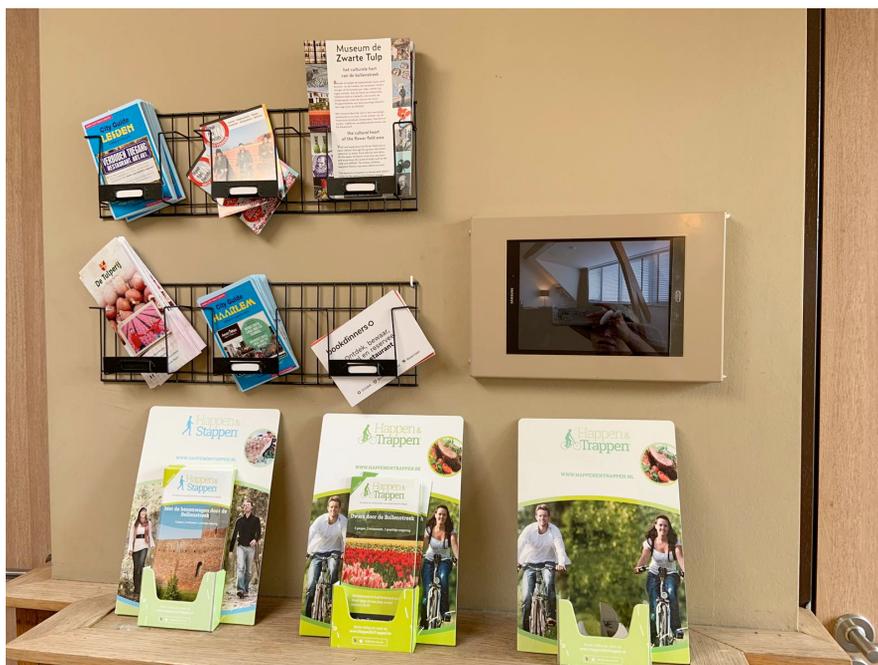

Universal wall mount for tablets between 9-11"

Universal tablet wall stand to be mounted flat against the wall. There is a thin mounting plate available for this, so that the cassette is mounted almost flat against the wall, the cable is guided invisibly through the holder and mounting plate along the wall.

The Securo series of wall mounts for tablets is unique in its kind. Thanks to the clever design, you can present almost all brands of tablets in all available sizes in the steel tablet casings.

The steel tablet holder is supplied with thick foam rubber corners and strips to keep the tablet firmly in the right place. The tablet enclosure can be mounted in portrait or landscape position. The enclosure is secured by 2 bolts, you can also opt for a steel quick lock system. This makes the holder easy to open and close and safe against theft. Uses of the Securo wall stand to be mounted flat against a wall.

The flat tablet stand type Securo is often used available for residential, business and commercial applications where the iPad or tablet is a element to centralize the control (ex: heating, thermostat, turn lights on/off, security, appliances, schedule of activities, etc.).
